Yacquub Adan

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company.

EDUCATION

De Montfort University, Leicester — PGDip *Computing*

FEBRUARY 2021 - JUNE 2022   **GRADE: DISTINCTION**

Modules included e-commerce software & systems, human factors in system design, system building methods, analysis & design and many more.

De Montfort University, Leicester — BSc *Computer Science*

OCTOBER 2017 - JULY 2020   **GRADE: FIRST CLASS**

Modules included data structures & algorithms, object oriented programming, database systems & design, computer systems & networks and many more.

PROJECTS

Beaumont Leys Mosque (Real World Project) - As a dedicated member of my local community, I was involved in a volunteer project to revamp the old website for our local mosque. Working closely with a team of fellow volunteers, I utilized my technical skills in website design and development to create a user-friendly and visually appealing website which is soon to be deployed.

GoldenShoe (Fullstack Web App) I took on the challenge of transforming the e-commerce website "Golden Shoe" into a modern and user-friendly platform. I utilized my skills in the MERN stack (MongoDB, Express.js, React.js, and Node.js) to bring this project to life.

Covid Blogs (Fullstack Web App) - Covid Blogs is a website that enables people to converse, share their experiences, and much more in blogs. Users are prompted to register and log in to create, view, and comment on community blogs/articles. The idea behind the creation of this website was to bring people together and create a community during the long covid pandemic.

Quiz-Go (IOS App) - An IOS quiz mobile application that requires registration and allows users to choose from various topics in the form of multiple-choice questions. The firebase database stored information regarding user scores, login information, and more. Followed the waterfall lifecycle throughout.

Hospital Booking System - Covers the procedure of booking an appointment at the hospital using object-oriented paradigms in java.

Lakers Website - Responsive website using HTML and CSS. Understanding the box model, media queries, and animations in CSS. Learning how to manipulate the DOM and fetch an API using asynchronous code.

WORK EXPERIENCE

Hastings Direct, Customer Service Advisor | Leicester

NOVEMBER 2022 — CURRENT

- Providing customers with new quotes, whether they're looking for car, bike, van, or multi-car policies.
- Giving them detailed descriptions that they need to make an informed decision & making sure they have the right cover that suits all their needs.
- Supporting customers to complete purchasing the policy over the phone using a designated software.

Office Administrator at Salaama Security Services | Leicester

JUNE 2018 — MARCH 2019

- Tasked as an office administrator, I would primarily be instructed to welcome customers and take candidates' details if they were interested in pursuing a security badge.
- Respond to incoming calls and communicate with potential clients who were interested in the course.
