Work History

2021-06 - 2022-10
Customer Service Representative
Sitel, Home Based
- Call up individuals who have either contacted or have been infected by covid-19; making sure that they are informed of the necessary steps and procedures directed by protocols. Completing questionnaires/forms with contacts and confirmed cases.
- Responsibilities included being friendly, having great communication skills and being patient with individuals, and answering any of their problems.
- Team meetings every week to discuss progress and possible changes.

2018-07 - 2019-01
Office Administrator
Salaama Security Services Leicester
- Tasked as an office administrator, I would primarily be instructed to welcome customers and take candidates' details if they were interested in pursuing a security badge.
- One of the many responsibilities that I had with this role was to bring customer satisfaction through communicating and aiding them with any issues they had.
- Being in an office environment, I was regularly using a computer to keep candidates' details up to date and stored on spreadsheets.

Personal Projects

Covid Blogs - NodeJs, EJS, MongoDB, JS
A website that enables people to converse, share their experiences, and much more in blogs. Users are prompted to register and log in to create, view, and comment on community blogs/articles. The idea behind the creation of this website was to bring people together and create a community during the long covid pandemic.

Hospital Booking System - Java
Covers the procedure of booking an appointment at the hospital using object-oriented paradigms (Composition, Aggregation, Inheritance, Polymorphism, etc.)

Quiz-Go - Swift, Firebase
IOS quiz mobile application that requires registration and allows users to choose from various topics in the form of multiple-choice questions. The firebase database stored information regarding user scores, login information, and more. Followed the waterfall lifecycle throughout.

Lakers Website - HTML, CSS Vanilla JS
Responsive website using HTML and CSS. Understanding the box model, media queries, and animations in CSS. Learning how to manipulate the DOM and fetch an API using asynchronous code.
